Machine Failures on the Rise: The Calm Before the Storm?

08-05-2024

Last updated: 05/16/2024

In recent weeks, we have received an increased number of inquiries and reports regarding machine failures. As production has been reduced due to lower demand, machines have been standing still for periods of time. This has led to increased problems with restarting production systems.

New service authenticity check

24.08.2022

Already over a longer period of time we notice that some drive series are discontinued more and more rapidly and radically.

As a follow-up reaction, these drives and engines are no longer offered in the form by the manufacturer while demand remains the same or even increases. This tempts companies to procure their drives from uncertified or dubious dealers.

Series repairs Omron

24.01.2022

Thanks to our many years of experience and expertise in dealing with Yaskawa, Omron did not present us with any major problems. problems. Control and design are very similar for both manufacturers, so that we were able to quickly expand our test stands and consequently our service portfolio. service portfolio in a timely manner.

Portfolio expansion of the Mitsubishi MRJ2S series

15.12.2021

Nowadays, you can buy the drive you need used on various trading platforms such as Ebay. The question arises, what exactly does **used** mean? How long will the drive still be functional?

Our experience with Asian traders

13.10.2021

Problem definition

A lot of drive technology can be purchased over the Internet, for example, from Ebay, Amazon or AliBaba. In most cases, the origin of these goods is from China. And here caution is advised, because the dealers are **not always honest** with you.
